submissions:

15 January 2025

Message from the Guest Editor

Dear Colleagues,

Unlike the conventional "one-size-fits-all" approach, precision medicine takes into account the uniqueness of each individual. However, there is still a lack of consensus on the most effective methodological approaches to fully leverage the potential of precision medicine.

One potential solution to this issue is the incorporation of evidence-based medicine (EBM) principles at the core of precision medicine. EBM is a well-established interdisciplinary approach that uses the best available evidence to inform clinical and public health decision-making, taking into account clinical expertise, patient values, and research evidence. The implementation of EBM in precision medicine by identifying relevant research studies, critically appraising their quality and integrating the evidence into clinical and public health could improve patient outcomes and reduce healthcare costs.

Therefore, this Special Issue aims to promote international understanding and development of EBM in precision medicine by presenting the latest research results and extensive review papers on the interchange between EBM and precision medicine.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
