### Message from the Guest Editor

I am pleased to announce that, due to the success of the first edition of the Special Issue “Emergency Medicine: Clinical Advances and Challenges in Diagnosis and Treatment”, we have launched a second edition in 2024 for high-quality submissions in the Personalized Critical Care Section.

The main objective of this edition is to acquire the most valuable information regarding the newest approaches in the diagnosis and treatment of emergency care patients that will create new perspectives on patient management through various case reports.

This second edition aims to collect and welcome articles from adjacent areas of acute care, such as intensive care, pre-hospital care, acute stroke care, health services research, and implementation research. Our goal is to improve the quality of care by publishing high-quality research for emergency medicine and related specialties, focusing on original research, reviews, and case reports to bring valuable educational information related to emergency medicine practice, teaching, and research.
