Message from the Guest Editor

Dear Colleagues,

Cardiovascular disease is a major cause of non-obstetric maternal morbidity and mortality, with increasing prevalence over the last two decades. It affects close to 1% of pregnancies in the developed world and 4% in the developing world. Although rheumatic heart disease comprises the most common maternal cardiac disease in the developing world, congenital heart disease is the most common maternal cardiac disease in the Western world. Optimal care for pregnant patients is best delivered by a multidisciplinary team which includes specialties such as cardiologists, maternal–fetal medicine specialists, anesthesiologists, geneticists, cardiovascular interventionalists and cardiac surgeons. The increased prevalence has led to the development and growth of the cardio-obstetrics field and related clinics worldwide.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
