Message from the Guest Editor

Dear Colleagues,

Despite many advancements in the field of shoulder surgery, several challenges remain, including tailored approaches to the treatment of irreparable or massive rotator cuff tears, shoulder instability in an athlete, acromioclavicular joint dislocations, and osteoarthritis. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of shoulder surgery and showcase the latest findings in the field. Studies include those that help guide and improve the treatment of rotator cuff disease, glenohumeral and acromioclavicular joint instability, and glenohumeral arthritis. The scientific advances in our field will help guide the treatment towards a patient-individualized approach and improved outcomes.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
