Respiratory Disease: Diagnosis, Treatment and Prognosis

Guest Editor:

Dr. Ioannis P. Tomos
5th Pulmonary Medicine Department, Sotiria Chest Diseases Hospital of Athens, 11527 Athens, Greece

Deadline for manuscript submissions:
30 June 2025

Message from the Guest Editor

Personalized medicine has emerged as a critical aspect of modern respiratory care, largely replacing the previous "one-size-fits-all" approach. The recent technological advances in diverse fields, such as genomic sequencing, invasive techniques, and drug as well as vaccination design, have contributed significantly to this achievement. Nowadays, our diagnostic and therapeutic horizons are still growing, critically improving patients' accurate diagnosis, survival, and quality of life in general in almost all respiratory diseases. However, there are still diverse challenges to deal with.

The aim of this Special Issue is to reveal all novel insights in diverse respiratory disorders, including asthma, chronic obstructive pulmonary disease (COPD), interstitial lung diseases (ILDs), and lung cancer.

This Special Issue will focus on cutting-edge research advances in various fields of respiratory care, including genetics, novel biomarker identification, therapeutic target development, and technological advances in invasive techniques that optimise the prompt diagnosis and beneficiary prognosis of various respiratory diseases.

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
