closed (25 April 2023)

Message from the Guest Editors

Dear Colleagues,

For more than a year now, the world has been facing one of the most aggressive pandemics it has ever known. Numerous discoveries have led to progress in understanding, treating, and preventing COVID-19 infection, but there are still many grey areas that need to be addressed to better understand this disease. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and showcase some of the latest findings in the field of COVID-19. Research on COVID-19 must be an international priority in view of the human and economic implications of the pandemic.

Prof. Dr. Patrick Plaisance

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
