Deadline for manuscript submissions:

**closed (15 December 2021)**

### Message from the Guest Editor

Dear Colleagues,

The worldwide prevalence of atherosclerosis and associated diseases is growing on an epidemic scale. Early detection of atherosclerotic changes requires modern molecular genetic, biochemical, pathophysiological, and equipment studies that enable personalized approaches to treatments.

Personalized medicine includes a range of approaches to health care based on factual data: from precise molecular diagnostics to prediction of the onset or development of disease based on genetic research.

We invite you to submit papers with the results of research on atherosclerosis aimed at improving technologies for the prevention, diagnosis, risk assessment, and treatment of atherosclerosis from the standpoint of personalized medicine.

We look forward to receiving your contributions.

Prof. Dr. Yuliya I. Ragino

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
