Message from the Guest Editor

After several pneumonia patients were reported to be positive for the severe acute respiratory syndrome coronavirus 2 in December 2019, it rapidly spread across the world. There have been more than 270 million confirmed cases of COVID-19, and 5.3 million deaths have been reported. In addition, a total of approximately 8.4 billion vaccine doses have been administered.

This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the global pandemic and its association with various otorhinolaryngologic diseases. Numerous cases have reported that COVID-19 infection and vaccination could induce various otorhinolaryngologic symptoms. Therefore, through this Special Issue, we would like to investigate various otorhinolaryngologic diseases related to COVID-19 and consider appropriate medical responses.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
