Message from the Guest Editors

Dear Colleagues,

The coronavirus disease 2019 (COVID-19) pandemic has held the world in its thrall since early March 2020 and, unfortunately, it still represents a very difficult challenge.

The purpose of this Special Issue is to provide an overview of several concerns related to COVID-19 syndrome and address questions regarding clinical management, including the proper utilization of healthcare resources.

Particular attention will be focused on therapeutic appropriateness and the use of pharmacological and complementary approaches useful to care for both infected patients and patients showing post-COVID sequelae.

This Special issue is open to both reviews and original research papers targeting any of these topics.

Prof. Dr. Amelia Filippelli

Dr. Valeria Conti
