

Computational Genomics in Disease and Wellness Genetics

Guest Editor:

Dr. Gwênlyn Glusman

Institute for Systems Biology,
Seattle, WA 98109, USA

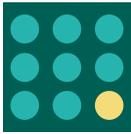

Deadline for manuscript
submissions:

closed (5 January 2022)

Message from the Guest Editor

With the current abundance of massive biological datasets, computational genomics has become one of the most important means to study human diseases and wellness. This special issue will encapsulate the latest applications of computational genomics in human disease and health genetics in the era of personalized medicine. We are soliciting papers focusing on, but not limited to, novel algorithms and data structures for genome analysis, analysis and integration of genetics, genomics, transcriptomics and networks in human health, disease and personalized medicine.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
