### Message from the Guest Editors

Dear Colleagues,

Diagnostic imaging in spine disease is of paramount importance today, and it includes an understanding of the pathology, its gravity, and influence on life, as well as the psychosocial background. Hence, appropriate management plan is crucial in diagnostic imaging.

Moreover, the constant technological developments have kept providing new updates to diagnostic imaging, with improved imaging visualization and more detailed images allowing a more sophisticated diagnosis and, ultimately, the best therapeutic strategy for the patient.

Spinal surgery sees the benefits of this tremendous technological innovation both in diagnosis and intraoperative imaging and/or navigation tools.

The goal of this Special Issue of the *Journal of Personalized Medicine*, “Diagnostic Imaging of Spine Disease”, is to publish new and interesting studies, particularly original research with a clinical focus.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
