Message from the Guest Editors

Immune-mediated diseases constitute a broad spectrum of diseases that cause serious consequences in patients. These diseases result in a clear compromise of immune response, which can cause an abnormal functioning of organs and systems, with responses at a systemic level. In this sense, immune-mediated diseases are not known in all cellular and molecular mechanisms. In addition, the repercussions on patients themselves are severe at both social and psychoneuroendocrinological levels. In this Special Issue, we want to bring together research that will allow us to give our patients personalized and more effective medicine.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
