Message from the Guest Editor

Dear Colleagues,

Chronic kidney disease is one of the most important risk factors for end-stage kidney disease. The number of chronic kidney disease patients is increasing, especially with age. The optimal strategy to prevent the progression of chronic kidney disease is an urgent question worldwide that remains unanswered. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and showcase some of the latest findings in the field of chronic kidney disease. We seek studies, including those that explore any conditions related to chronic kidney disease, using basic science, clinical and population-based approaches, as well as all kinds of behaviors for public awareness. Scientific advances in the field of chronic kidney disease will provide the promise of a more optimistic future for patients.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
