### Message from the Guest Editor

Dear Colleagues,

Precision medicine is reshaping the paradigm of cancer treatment, and the management of gastric cancer has also recently moved toward a tailored therapeutic approach.

This Special Issue aims to highlight the most recent acquisitions around the molecular and cellular biology of gastric cancer, and it focuses on the most compelling advances in tailoring of systemic therapies in patients affected by this disease. The growing knowledge about the genomic landscape of gastric cancer has paved the way for the development of novel targeted drugs and the identification of relevant predictive factors.

Beyond the introduction of anti-HER2 agents more than ten years ago and, more recently, anti-VEGF drugs, the most promising targets include claudin 18.2 and FGFR, but many trials are ongoing.

Articles investigating genetic and epigenetic drivers or other significantly altered pathways, as well as preclinical or clinical studies focused on the molecular profiling, are welcome.

Dr. Valeria Merz

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
