University, Seoul 156-755,
Republic of Korea

Deadline for manuscript
submissions:

25 March 2025

Message from the Guest Editor

Liver disease is a general term that refers to any condition affecting the liver. It may develop for different reasons, such as acute or chronic hepatitis by viral, toxic, autoimmune and other causes, fatty liver disease, hepatocellular carcinoma, liver cirrhosis and liver failure. There have been many studies on novel challenges and advances of liver disease, but the field still needs continuous effort and research.

The aim of this Special Issue of *JPM* is to evaluate and discuss novel challenges and advances in liver disease. It includes the study of disease mechanism, diagnosis and differential diagnosis, medical management, surgical management and prognosis.

We invite colleagues around the world to share their experience and knowledge on novel challenges and advances in liver disease with original studies, reviews or communications in order to develop this important field.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
