Deadline for manuscript submissions:

closed (25 July 2022)

Message from the Guest Editor

Dear Colleagues,

Transplantation has been the most potent and successful driver to study the immune system and the genetic individuality of HLA. These discoveries have led to clinical application of transplantation, saving life of patients affected by terminal organ failure. Organ transplantation has also driven the development of immunosuppressive agents to control activation of the immune system. Today, renal transplantation is the best treatment available for patients with end stage renal disease. Personalized medicine is today one of the most important task of modern medicine, and it is absolutely clear that transplantation, by its nature, is the best examples of applied personalized medicine, as we personalize organ allocation and the immunosuppressive strategy in our patients.

We are inviting you to participate in this discussion on personalized medicine, submitting your personal experience or personal view to be published in the special number of *Journal of Personalized Medicine* dedicated to "Renal transplantation and immunology".

Dr. Franco Citterio *Guest Editor*

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
