submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

In recent years, the field of Ophthalmology has been constantly updated, thanks to the development of increasingly modern technologies that have allowed significant progress in diagnosing, managing, and treating ocular pathologies.

In particular, ocular diagnostic technology (optical coherence tomography, optical coherence tomography angiography, ocular ultrasound, etc.), as well as new genetic discoveries, have provided new insights and increased our knowledge about several ocular diseases, such as retinal and choroidal diseases, ocular oncology, optic nerve diseases, and anterior segment diseases, which poses a compelling challenge in Ophthalmology.

This Special Issue will aim to promote research on the new advances and perspectives in Ophthalmology, going from diseases' etiology to the diagnosis and the tailored treatment of ophthalmic pathologies, trying to better understand the nature of these challenging ocular conditions and how to properly deal with them.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
