Message from the Guest Editor

Lymphoproliferative neoplasms represent a large spectrum of diseases, whose etiopathogenesis, clinical features, and treatment is very differentiated. In the meanwhile, we observe more frequent histotypes for which we dispose of standard therapies, as well as more rare histopathological and molecular entities, also recently identified, for which the best treatment options are in definition within clinical trials.

In this Special Issue, we aim to collect the results from clinical trials, cohort studies, case reports and reviews, on the innovative therapeutic approaches for lymphomas. We would mostly focus on rare histotypes, for example peripheral T-cell lymphomas, mantle cell lymphoma or extra-nodal lymphomas, and on forms for which the treatment is chosen based on genetic or epigenetic profiles.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
