Message from the Guest Editor

Dear Colleagues,

Within this special issue, we aim to gather a diverse array of research articles, reviews, and brief reports that push the boundaries of our current understanding and clinical practices. Potential topics include, but are not limited to, the role of the nervous system in cancer development and progression, neuro-oncology, the impact of tumors on neural function, and innovative treatments targeting these intersections.

This Special Issue provides an excellent platform for researchers and clinicians to share their groundbreaking work with the global medical community. Contributions may address various aspects of neuroscience and oncology, including molecular pathways, clinical case studies, therapeutic trials, and translational research.

We would be honored if you could contribute your expertise and research findings to this Special Issue.

Join us in advancing the field of cancer neuroscience and making significant impacts on patient care and outcomes.
