Message from the Guest Editor

Dear Colleagues,

Biobanks are infrastructures aiming at collecting, processing, storing and distributing biological samples (usually human) and derivative materials for use in research, along with associated data and within defined regulatory frameworks.

Biobanking has become an important resource in medical research, supporting the scaling-up of many types of contemporary research such as genomics and personalized medicine. In recent years, many disease-oriented biobanks have emerged, while tumor biobanks have attracted great interest and funding.

This Special Issue will focus on recent advances in the field of biobanking and biobanking research and its application of novel techniques in the field of personalized medicine. Original articles and reviews highlighting biobanks in disease treatment and personalized medicine are welcome.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
