### Message from the Guest Editors

Dear Colleagues,

The worldwide prevalence of orthopedic diseases has increased with the aging of the population. Orthopedic diseases have always had a high morbidity and disability rate, and it is necessary to conduct further research on their pathogenesis, diagnosis and treatment methods. Both in conservative as well as operative treatment approaches, patient-tailored therapy regimens are increasingly relevant. Nowadays, digital technologies are relevant for the treatment of orthopedic patients and new technologies, including robotic surgery, computer-aided design, finite element method, medical image processing, and digital twin, offer clinical decision makers a growing variety of options. The goal of digital orthopedics should always be the optimization of diagnosis and therapy and to finally realize the target of personalized medicine.

For this Special Issue, we are pleased to invite researchers to contribute with original research articles and reviews which are dedicated to personalized approaches, new technologies in orthopedics, risk factors, and the diagnosis and treatment of post-operative complications.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
