Department of Cranio-Maxillo-Facial-Surgery, University Hospital Ulm, 89081 Ulm, Germany

Deadline for manuscript submissions:

closed (20 May 2024)

## **Message from the Guest Editor**

In recent years, advances in computer-assisted surgery have made it increasingly possible to offer personalized reconstructions to patients undergoing head and neck surgery. Reconstructions with patient-specific implants and surgical templates must be mentioned specifically in this context. In this respect, further developments should now focus on decreasing the workflow and, above all, increasing user friendliness and the faster availability of individual solutions.

However, new knowledge in the field of personalized diagnostics with regard to potential prognostic factors and personalized (non-)surgical therapy approaches for head and neck oncology is an exciting and forward-looking topic of research

With this Special Issue, authors are invited to present their most recent developments and findings in personalized diagnostics and therapy in the field of head and neck surgery.

## Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
