Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

Cancer is a multifaceted disease that involves not just appearance at a single body site, but rather has the potential of spreading throughout body organs through the metastasis process. In addition to that, it poses a number of problems in its treatment, and recurrence is a harsh reality for this disease. Factors within the tumor microenvironment play key roles in the process of recurrence and metastasis. These factors include stroma cells and extracellular matrices. Deregulated processes, due to factors such as genetic mutations, including angiogenesis, tumor suppression, repair mechanisms and cell cycle, contribute to the so-called cancer phenotype.

The aim of this Special Issue is to provide a collection of research articles, research letters and reviews that deal with the molecular mechanisms of cancer progression and recurrence. The submitted papers may cover any aspect of cancer biology that deals with these issues (not leaving out the interplay with the immune system). Papers that refer to clinical processes based on targeting any cancer progression and recurrence mechanism will be considered too.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
