Message from the Guest Editor

Dear Colleagues,

Psoriasis and skin tumors, such as cutaneous squamous cell carcinoma and melanoma, are abnormal skin diseases which bring a great burden to some patients and society. However, the pathogenesis of these diseases is not clear and there is a need for more research on the pathogenesis and new therapies. This special issue of the *Journal of Personalized Medicine* aims to show some of the latest findings in the field of Psoriasis and skin tumors. Studies include those that explore the pathogenesis or the treatment of Psoriasis and skin tumors using basic science, clinical and other approaches. The scientific advances in the field of Psoriasis and skin tumors will continue to pave the path towards personalized treatment for patients.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
