### Message from the Guest Editor

Dear Colleagues,

Asthma is a heterogeneous disease comprising several phenotypes or endotypes driven by different pathways.

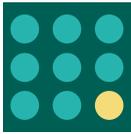

The aim is to highlight phenotypes, endotypes, and personal traits that could lead to increased susceptibility to the disease or heightened incidences, and to then use this information as a basis for which tailor-made prevention and treatment strategies can be devised for individuals or groups of patients such that they can receive specific therapies, i.e., the optimal medications that work best for them at the right time without wasting resources on trial and error treatments.

Another aim is to address additional factors such as environmental, occupational, psychological, and personality factors which are capable of affecting asthma management but are often ignored.

For this Special Issue, we welcome research papers, clinical trials, and reviews addressing factors that could contribute to the use of personalized approaches in addressing asthma.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
