Deadline for manuscript  
submissions:

**closed (10 December 2022)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the research and current practice on personalized medicines in cardiovascular disease. It aims to collect, share, and expand knowledge on the early detection and prevention of cardiovascular disease requires clinical epidemiologic, pharmacologic, biochemical, pathophysiological, and equipment studies, which enable a personalized approach to the choice of treatment. Moreover, we are pleased to invite you to submit papers with the results of basic and clinical research on cardiovascular disease aimed at improving the technologies for the prevention, diagnosis, risk assessment, and treatment of cardiovascular disease from the standpoint of personalized medicine. Research articles, clinical studies, and reviews are all welcome.

Prof. Dr. Gwo-Ping Jong

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
