Deadline for manuscript submissions:

**closed (31 August 2020)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the utilization (or implementation) of genomic technologies (including family history) in various clinical practices and showcase innovative and novel approaches to integrating genomic technologies into practice. In particular, we are interested in examples of innovative clinical programs and evidence of provider utilization, patient acceptance, cost-effectiveness, and/or feasibility. Papers may address use of telemedicine, as well as other aspects of digital health to solve challenges in resource-limited settings (e.g., limited access to geneticists, genetic counselors), molecular review boards, team-based care, and other clinical delivery approaches. Case reports, reviews, and original articles are welcome.

Dr Susanne B. Haga

Dr. Lori A. Orlando

Medicine and Pathobiology,  
Department of Surgery,  
University of Toronto, 6 Queens  
Pk Crescent W.F, Toronto, ON  
M5S 3H2, Canada

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
