Deadline for manuscript submissions:
closed (5 November 2020)

Message from the Guest Editor

Dear Colleagues,

The first successful applications in personalized medicine were made possible largely in part by the advent of next-generation sequencing techniques. The use of proteomics for personalized medicine was hampered by technical limitations, such as high-throughput measurements. However, the field of proteomics is evolving at a fast pace now, and recent breakthroughs will make proteomics a valuable asset in the arsenal of techniques used in personalized medicine.

In this Special Issue, we want to present some of the latest technical developments in proteomics that will enable its use in personalized medicine and also pioneering applications. Therefore, we are looking for interesting cutting-edge contributions to our journal that use proteomics, from hardware to data analysis, for personalized medicine or that facilitate the implantation therein.

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
