Dear Colleagues,

Head and neck cancer is the seventh most common type of cancer worldwide and comprises a diverse group of tumors affecting the upper aerodigestive tract. In 2018, 890,000 new cases and 450,000 deaths were reported globally.

We are pleased to invite you to submit basic research aimed at improving technologies for the prevention, diagnosis, risk assessment, and treatment of head and neck cancer.

This Special Issue aims to familiarize physicians and researchers with the latest advances in such research from the standpoint of diagnostics, prevention, and management. We welcome original research articles and reviews, with research areas including (but not limited to):

Experimental research in the field of head and neck cancer; Genomics, GWAS, and population genetics in head and neck cancer; Head and neck cancer epigenetics; Proteomic investigation of head and neck cancer; Etiopathogenetic aspects of head and neck cancer; Metabolic disorders of head and neck cancer; Tumor microenvironment of head and neck cancer; Individual management of head and neck cancer; Lineage tracing and evolution of head and neck cancer.
