Deadline for manuscript
submissions:
closed (25 November 2023)

Message from the Guest Editor

Biomarkers play a crucial role in the diagnosis, treatment, and management of cancer patients. Nowadays, advances in detection technologies allow greater insight into the molecular mechanisms of a variety of malignancies. Additionally, biomarkers are currently in clinical practice with a prognostic role to identify patients' outcome and a predictive role for response to chemotherapy, targeted agents, and immunotherapy.

This Special Issue aims at reviewing the current state of cancer biomarker development and the prospects for improving cancer care with new technologies and biomarkers.

Special Issue
Editor-in-Chief

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
