Message from the Guest Editor

Dear Colleagues,

Prenatal screening and diagnosis play a pivotal role in identifying and managing potential risks and complications during pregnancy. However, the one-size-fits-all approach often fails to account for the individualized needs and preferences of expectant parents. This Special Issue seeks to address this limitation by emphasizing the importance of personalized medicine in prenatal care. By considering factors such as maternal age, family history, and individual genetic variations, personalized approaches aim to provide tailored and more accurate information, facilitating informed decision making and optimizing outcomes for both mother and baby.

The Special Issue on "Personalized Approaches to Prenatal Screening and Diagnosis" presents a comprehensive exploration of the rapidly evolving field of prenatal care. This issue aims to shed light on the advancements, challenges, and future directions in the field. We invite you to submit original research, clinical studies, systematic or state-of-the-art reviews, or other related submissions.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
