Dr. Antonio Simone Laganà

Paolo Giaccone Hospital, Department of Health Promotion, Mother and Child Care, Internal Medicine and Medical Specialties (PROMISE), University of Palermo, Palermo, Italy

Deadline for manuscript submissions:

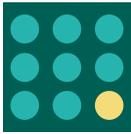

closed (10 March 2024)

Message from the Guest Editors

Starting from March 2020, a global pandemic of coronavirus disease (COVID-19), caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), was declared by the World Health Organization. Pregnant women need careful management because of their relatively immunosuppressed state and restricted respiratory capacity. This should be taken into account carefully, considering that poor reproductive and maternal–fetal outcomes were associated with other viral infections.

This Special Issue aims to present papers focusing on the symptoms and signs of COVID-19 in pregnant women, the effects of SARS-CoV-2 infection on early, mid-, and late-term pregnancies, the maternal–fetal transmission of the virus, the placental characteristics of pregnancies complicated by SARS-CoV-2 infection, the effects of SARS-CoV-2 infection on assisted reproduction technologies (ARTs), the organizational changes in healthcare environments involved in the management of pregnant women and/or women who are seeking pregnancy through ARTs, new therapeutic and vaccination strategies, and the impact of the current pandemic on the mode of providing obstetric care.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
