Message from the Guest Editor

Topic brief introduction: We are pleased to introduce a Special Issue focusing on eHealth, telemedicine, AI, and rehabilitation in the precision medicine era. This Special Issue explores how these technologies intersect to optimize healthcare delivery and enhance patient outcomes.

Types of Papers Solicited: Original research articles and reviews that explore the integration of digital health technologies in personalized medicine and rehabilitation.

This Special Issue will feature papers on the integration, evaluation, and practical application of eHealth and AI in medicine and rehabilitation. It aims to provide a platform for sharing rapid advancements in AI, precision medicine, wearable devices, remote monitoring, eHealth applications, telemedicine, telerehabilitation, and virtual conferencing tools. Themes include, but are not limited to, innovative assessment and screening methods, AI-driven treatment planning and monitoring, personalized intervention strategies, and the use of LLMs (Large Language Models) in healthcare. Throughout this Special Issue, I look forward to facilitating active discussion on this topic.
