Deadline for manuscript submissions:

closed (30 September 2020)

# **Message from the Guest Editor**

Despite many advances in diagnosis and treatment, cardiac disease still accounts for the highest percentage of deaths worldwide. The last decade has seen a rise in the personalized risk stratification of persons at risk of heart disease, novel genetic determinants of certain cardiac disorders including hypertrophic cardiomyopathy, dilated cardiomyopathies and hyperlipidemia, as well as newer immune-mediated cholesterol therapies. This Special Issue of the Journal of Personalized Medicine aims to review the most significant discoveries in the diagnosis and treatment of cardiac disease, with a clear focus on the increasing personalization of the approach to cardiac care. Our goal is to attract the most significant new cardiac research regarding personalized medicine, as well as to review the game-changing personalization of cardiac care in the last decade. We are soliciting original research articles and review articles for this Special Issue.

## **Message from the Editor-in-Chief**

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
