Deadline for manuscript  
submissions:

**closed (30 May 2015)**

### Message from the Guest Editor

Dear Colleagues,

Cancer is a complex disease. Because of successes in screening, early detection, and individualized oncology treatments, cancer is increasingly seen as a chronic condition. Both acute treatment and long-term management require the dedication of a multidisciplinary team of clinicians and researchers, as well as continuing patient engagement and empowerment.

This Special Issue on survivorship focuses on the long-term aspects of living with cancer, and covers a time period from diagnosis, through treatment, and into the years beyond. Topics span biopsychosocial factors, the self-management of symptoms and co-morbidities, lifestyle changes, future survivorship risks, and considerations at the individual, family, and health system levels.

Prof. Dr. Jane M. Armer

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
