Message from the Guest Editor

Dear Colleagues,

Postoperative complications are invariably an important topic concerning patients treated in various surgical departments. This Special Issue, entitled “Postoperative Complications and Personalized Medicine”, aims to provide insight into the issue of individualizing the approach to individual patients or standardized groups of patients. Due to the extent of the subject matter, it was decided to limit it to urology and general surgery. We would like to devote special attention to the issue of personalizing perioperative care in elderly patients undergoing surgery for oncological conditions. Another aim of this issue is to emphasize the importance of individual assessment of the results of surgical treatment in homogeneous groups of patients. Attention is also given to the use of appropriate management algorithms and questionnaires for assessing the effectiveness and quality of surgical treatment.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
