Selected Papers from the 2nd Conference with International Participation “Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine”

Guest Editors:

Prof. Dr. Yuliya I. Ragino

Institute of Internal and Preventive Medicine–Branch of Institute of Cytology and Genetics, Siberian Branch of Russian Academy of Sciences, 630089 Novosibirsk, Russia

Dr. Oksana D. Rymar

The Institute of Internal and Preventive Medicine, Branch of the Federal Research Center Institute of Cytology and Genetics, Siberian Branch of Russian Academy of Sciences, St. B. Bogatkova 175/1, 630089 Novosibirsk, Russia

Deadline for manuscript submissions:

closed (15 April 2024)

Message from the Guest Editors

This Special Issue is aligned with the second conference with international participation, “Basic Research in Endocrinology: A Modern Strategy for the Development and Technologies of Personalized Medicine,” which will be held in Novosibirsk (Russian Federation), 24–25 November 2022.

The purpose of this conference is to disseminate the latest basic and clinical findings in the fields of etiology, clinical characteristics, and modern diagnostics and treatments of endocrine disorders among a wide spectrum of specialists.

For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Genomic research in endocrinology;
- Biochemical characteristics of endocrine aberrations;
- Cellular technologies in endocrinology;
- Metabolomic research in endocrinology;
- High-tech care of patients with endocrine disorders;
- and other related research in this field.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank: CiteScore - Q1 (Medicine (miscellaneous))
