Message from the Guest Editor

Dear Colleagues,

Treatment goals for glaucoma have focused almost exclusively on lowering intraocular pressure (IOP) using drugs, laser therapy, or surgery. Surgery should be considered whenever medical or laser treatment is unlikely to maintain sight in the glaucomatous eye. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current treatment of glaucoma. It is important to investigate both the safety and the efficacy of IOP-lowering medication, laser surgery, or incisional surgery. I am confident that the results of such studies will be beneficial not only for glaucoma patients but also for physicians. The accumulation of these results will improve the quality of life in patients with glaucoma.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
