Deadline for manuscript  
submissions:

**closed (15 May 2022)**

### Message from the Guest Editor

Paediatric central nervous system (CNS) tumours encompass a wide variety of diagnoses, from benign to malignant. Any CNS tumour can be associated with significant morbidity, even when low grade and CNS tumours represent the deadliest cancer in paediatric patients. As paediatric malignancies occur early in life, they result in a tremendous loss of quality-adjusted-life-years both from death and from poor quality of life, due to the disabling consequences of treatment in surviving patients. This Special Issue will focus on novel personalized treatment approaches to treat paediatric CNS tumours, which should improve the quality of life for patients with these tumours.

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM; ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
