Message from the Guest Editors

Perioperative medicine is a clinical area related to the perioperative management of anesthetic and surgical patients. Optimal perioperative management is essential to reduce the risk of perioperative morbidity or mortality.

The aim of this Special Issue of the *Journal of Personalized Medicine* is to provide a comprehensive overview regarding individual evaluation, management, and outcome in perioperative medicine. Areas to be covered in this Special Issue may include, but are not limited to: preoperative anesthetic and surgical risk evaluation, intraoperative monitoring and management, and postoperative anesthetic and surgical outcome evaluation.

In this Special Issue, we welcome the submission of both original research and review articles targeting any of these topics.
