Department of Anesthesiology and Pain Medicine, College of Medicine and Medical School, Chosun University, Gwangju, Korea

Deadline for manuscript submissions:

closed (30 June 2022)

Message from the Guest Editors

Perioperative medicine is a clinical area related to the perioperative management of anesthetic and surgical patients. Optimal perioperative management is essential to reduce the risk of perioperative morbidity or mortality.

The aim of this Special Issue of the *Journal of Personalized Medicine* is to provide a comprehensive overview regarding individual evaluation, management, and outcome in perioperative medicine. Areas to be covered in this Special Issue may include, but are not limited to: preoperative anesthetic and surgical risk evaluation, intraoperative monitoring and management, and postoperative anesthetic and surgical outcome evaluation.

In this Special Issue, we welcome the submission of both original research and review articles targeting any of these topics.

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank: CiteScore - Q1 (Medicine (miscellaneous))
