Message from the Guest Editor

Oral disease and dysfunction not only influence oral function, but also systemic diseases and impairment. In this regard, the importance of oral medicine is increasingly being focused on. For example, the associations of oral dysbiosis and oral diseases and systemic diseases such as cancers and systemic diseases are going to be analyzed. It has also been noticed that oral hypofunction/dysfunction is strongly related to frailty.

For more advanced contributions of oral science and dentistry to medicine, it is very important to accumulate scientific knowledges and establish precision diagnosis and precision analysis in oral science and dentistry.

We invite you to contribute to this Special Issue of *JPM* on precision medicine in oral science and dentistry. This Special Issue is open to a wide variety of areas of oral science and dentistry, especially concerning diagnostic methods (digital dentistry, genomic analysis, etc.) and linkages to systematic diseases, dysfunction, and frailty.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
