Deadline for manuscript submissions:

**closed (29 February 2024)**

### Message from the Guest Editor

Medical practice is fully immersed in the era of precision medicine by means of predictive techniques and bioinformatics applied to solid or liquid biopsies. Advances in our understanding of molecular alterations in various malignancies have allowed for the development of ever finer diagnoses, effective targeted therapies, and the prediction of accurate prognoses in the setting of modern immunotherapies. Today, gynecological oncology can be considered to all effects an ultra-specialized branch enriched by clinical-pathological correlations, not only for the ascertained role of the Human Papilloma Virus (HPV) in oncogenesis and the consequent introduction of HPV-test in cervical cancer screening next to PAP-smear, but also for the broad availability of diagnostic, prognostic and predictive immunohistochemistry, and for the possibility of genomic profiling in female tumors through next-generation sequencing. The aim of this Special Issue is to highlight the latest advances in the comprehensive context of precision medicine in gynecological oncology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM, ISSN 2075-4426)* is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q2 (*Medicine (miscellaneous)*)
