Message from the Guest Editor

Malignant tumors emerging from the urinary tract make up a significant part of all human neoplastic diseases, with prostate cancer being the second most commonly diagnosed malignancy among men worldwide. Because of their aggressive clinical course and substantial burden for both healthcare systems and for individual patients, every effort should be undertaken to develop more precise diagnostic methods and more effective therapeutic modalities.

In this Special Issue of *JPM*, we present a series of high-quality original articles and meta-analyses concerning various urologic malignancies, illustrating the current developments in both diagnosis and treatment.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
