Diagnosis and Treatment of Endocrine Disorders

Message from the Guest Editors

Hormones play a fundamental role in the homeostasis of all organs and tissues. Therefore, endocrine dysfunction, both as an excess and defect, has a considerable impact on human health, particularly on the heart, bone tissue, skin, central and peripheral nervous systems, kidney and adipose tissue. However, the diagnosis of endocrine disorders is not always easy, and misdiagnoses can often occur due to multiple bias. Moreover, the treatment of endocrine disorders is also constantly evolving in search of the best therapeutic strategy for the same diseases. In this Special Issue, original studies on all new aspects for the diagnosis and treatment of endocrine disorders are welcome, particularly relating to thyroid disease, osteoporosis, thyroid eye disease, thyroid cancer or adrenal diseases.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
