

## Special Issue

# Trauma Surgery: Strategies, Challenges and Vision of the Future

### Message from the Guest Editors

This Special Issue is dedicated to the latest advancements in the surgical management of orthopedic trauma, including upper-limb injuries. As the field of orthopedic surgery continuously evolves, innovative surgical techniques and treatment modalities have been developed to enhance patient outcomes and recovery. This Special Issue aims to gather high-quality studies, including original research and reviews, exploring various surgical approaches to treating orthopedic trauma. We seek to cover a broad spectrum of topics, ranging from fracture fixation methods to soft-tissue repair, and address the potential complications associated with these treatments. Our goal is to provide a comprehensive resource that not only enriches the existing literature but also promotes the dissemination and exchange of knowledge within the scientific community. By doing so, we hope to advance the field of orthopedic trauma and improve clinical practices globally.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
