Recent Advances in Oral Diseases—2nd Edition

Message from the Guest Editor

Oral diseases are known for their wide prevalence globally, leading to a deterioration of general health if they are left unmanaged. Dental caries, periodontal disease, tooth loss, and cancers of the lips and oral cavity are the most prevalent oral diseases, contributing to a global burden. Personalised dentistry is a new avenue for the early diagnosis and effective treatment of oral diseases. Innovative avenues and platforms to either further the understanding of the pathobiology of oral diseases or effectively manage patients diagnosed with these conditions and lesions are of most need. This Special Issue, therefore, focuses on the recent advances and developments of oral diseases from bench to bedside in order to improve the standard of care for patients with these conditions and lesions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
