Sinonasal and Skull Base Pathologies: Personalized Management Based on Radiological and Biological Fingerprint

Message from the Guest Editors

It is our great pleasure to invite you to contribute to this Special Issue of the *Journal of Personalized Medicine*. In the past few decades, our understanding of sinonasal pathologies and skull base lesions has improved. As a result, many inflammatory sinonasal lesions involving the skull base may now be effectively treated endoscopically, and several benign and malignant tumors can be approached using different personalized surgical techniques. Nevertheless, several limits are still present and, for some rare histologies, the correct management is still open to debate. In this Special Issue, we aim to highlight the most recent advancements in this field, focusing our attention on the personalized management of different sinonasal and skull base pathologies.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
