Advances in Personalized Diagnosis and Treatment in Dermatology

Message from the Guest Editor

Dermatology is rapidly advancing, and the focus on personalized diagnosis and treatment has never been more crucial. The landscape of dermatology has been profoundly shaped by technological advancements and a deeper understanding of the genetic and environmental factors influencing skin diseases. Tracing the evolution of dermatologic treatments reveals a significant journey from one-size-fits-all approaches to tailored therapies. The aim and scope of the Special Issue is to highlight innovative research and developments in personalized dermatologic diagnosis and treatment, emphasizing the importance of addressing the unique needs of each patient. Contributions should present groundbreaking findings in the diagnosis, treatment, and management of dermatologic conditions. Original research articles and innovative reviews focused on new insights in personalized dermatology are welcome.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
