

## Special Issue

# Personalized Medicine of Digestive Diseases

### Message from the Guest Editor

The *Journal of Personalized Medicine* is pleased to announce a Special Issue focused on digestive disease (DD)-related topics, including in the esophagus, stomach, small and large intestines, and rectum. This Special Issue aims to present the emerging studies and developments in DD diagnosis, management, and treatment. We are interested in articles that explore not only novel imaging techniques, endoscopic and surgical management, and systemic therapies, but also the pathophysiology, molecular biology, and gut microbiome of DD. We welcome original studies, clinical case reports (sample size no less than 10), and reviews from researchers, clinicians, and experts in the field. This Special Issue is an excellent opportunity to share your study with a broad audience of medical professionals and advance our understanding and treatment of DD.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

### Author Benefits

#### High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

#### Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
